

2023 Brief CV Form (Speakers)

1. Speaker's Information

Name	Ho-Seok Sa, MD, PhD
Affiliation	Department of Ophthalmology, Asan Medical Center, University of Ulsan College of Medicine, Seoul, Korea
Position	Professor
Tel (Office)	02-3010-3680
Cellular Phone	010-4655-8752
E-mail	lineblue@hanmail.net

2. Education / Career

2022 – Present. Professor of Ophthalmology, Chief, Division of Ophthalmic Plastic & Reconstructive Surgery, Asan Medical Center, University of Ulsan, College of Medicine, Seoul, Korea

2017 – 2019 Visiting associate professor, MD Anderson cancer center, The university of Texas, Houston, Texas, USA

2016 – 2022 Associate professor of Ophthalmology, Asan Medical Center, University of Ulsan, College of Medicine, Seoul, Korea

2011 – 2016 Assistant professor of Ophthalmology, Asan Medical Center, University of Ulsan, College of Medicine, Seoul, Korea

2023 – Present. Executive Director, Korean Society of Ophthalmic Plastic and Reconstructive Surgery

2021 – Present. Secretary, Asia-Pacific Society of Ophthalmic Plastic and Reconstructive Surgery

2018 – Present. International Member of American Society of Ophthalmic Plastic and Reconstructive Surgery

2010 – 2012 Ph.D, School of Medicine, Sungkyunkwan University, Seoul, Korea

2004 – 2006 M.S., School of Medicine, Sungkyunkwan University, Seoul, Korea

1995 – 2001 College of Medicine, Seoul National University, Seoul, Korea

3. Publications List (Please fill out a maximum of 10.)

2023 Abstract Form (Speakers)

Title	Ocular complications after periorbital rejuvenational procedures: clinical manifestations, prevention, and management
Author(s)	Sa, Ho-Seok Department of Ophthalmology, Asan Medical Center, University of Ulsan College of Medicine, Seoul, Korea
Abstract	Cosmetic dermatologic procedures such as botulinum toxin injections, laser/light-based therapy, chemical peels, and fillers can cause ocular complications. These complications include dry eye, blepharoptosis, corneal abrasion, conjunctivitis, and even retinal artery occlusion. To prevent these complications, dermatologists should be aware of the anatomy and physiology of the eye and take precautions such as proper positioning and using protective eye shields. Management of ocular complications involves prompt referral to an ophthalmologist and proper treatment, which may include lubrication, antibiotics, or even surgical intervention. Dermatologists should prioritize patient safety and communicate the potential risks of cosmetic procedures to their patients.
Keyword(s) Up to 5 words	Ocular complications; Corneal abrasion; Conjunctivitis; Retinal artery occlusion
