

Nariaki MIYATA M.D., Ph.D.

Xymax Nishishimbashi build 5F, 2-6-2, Nishi-shimbashi, Minato-ku, Tokyo,  
Japan, 1050003

E mail : [nmiyata@toracli.com](mailto:nmiyata@toracli.com)

I am the director of Miyata Plastic Surgery & Skin Clinic in Shimbashi, Tokyo. I'm boarded-certified Plastic Surgeon in Japan, and well-versed in aesthetic dermatology. I have extensive experience in minimally invasive or non-invasive procedures, such as energy-based devices, injectables, and thread lifts.

In Japan, I am one of the leading authorities in dermatologic lasers and well-known correspondent of Japan's aesthetic surgery and dermatology. My clinic has more

than 40 different kinds of lasers and energy based devices. My advantage is that I have engineering knowledge about EBD. Moreover, I am faculty of various injectable products in Japan.

I have given extensive lectures on EBD therapy, injectables, and thread lift over 40 times each year domestically and abroad. I have published many articles and books which have also translated and sold outside Japan such as in Korea. Now my interests focus on combination facial rejuvenation (with EBD, thread & injectables), picosecond laser, various HIFU comparison, and body sculpting combined with various devices.
