

**Presentation title:** The Role of Lasers in Various Scars Treatments

**Date:** 6/24(Sat) 10:00-10:20 / 2F Grandballroom

**Proposed Abstracts:** The effectiveness of lasers in reducing the appearance and improving the unwanted textures of scars will be explored, along with the different types of lasers used and their respective advantages when addressing scars presented in range of body treatment areas. The presentation will also cover how to safely and minimise associated risks with proper handling and procedures used during laser treatments. Attendees will leave with a comprehensive understanding of the role of lasers in scar treatment and their potential benefits for patients.
