

Skin boosters delivery using the innovative laser-jet injector: Review of various case of dermal rejuvenation

Winnie Villarica-Hayano

The Skin Inc Dermatology and Laser Center

Delivering active ingredients into the skin effectively and safely is challenging for physicians. Whether it is the form of cosmetics, drugs or vaccines, the ability to penetrate skin at a precise depth and quantity is important to achieve efficacy. The Mirajet platform is a novel laser assisted drug delivery device that can offer doctors and patients a fast, needle free and relatively painless treatment option.
